02454467	Apo-Alendronate/Vitamin D3	70mg & 70mcg	Tab	APX	2.4348
(Interchangeable with Fosavance)					

## Therapeutic Note

Note: The recommended dose of Vitamin D for osteoporosis prevention and treatment in adults over 50 years old is at least 800 IU/day, in conjunction with calcium. This product does not provide the total recommended daily intake of Vitamin D; supplemental Vitamin D may be required. The appropriate dosage of ALENDRONATE & CHOLECALCIFEROL must be determined by the physician based on the patient's vitamin D requirement.

### Reason For Use Code and Clinical Criteria

#### Code 183

For patients with:

- a) NYHA Class II or III Congestive Heart Failure (CHF); and
- b) Currently being treated with an angiotensin converting enzyme (ACE) inhibitor, diuretics with or without digoxin, or previously treated, and failed these agents; and
- c) An ejection fraction less than or equal to 35%; and
- d) At least one episode of symptomatic CHF within a 12 month period while receiving optimal management.

LU Authorization Period: Indefinite

### Therapeutic Note(S)

Notes: Patients greater than or equal to 6 years of age diagnosed with ADHD according to DSM-IV criteria and where symptoms are not due to other medical conditions which affect concentration, and who require 12-hour continuous coverage due to academic and/or psychosocial needs, and who meet the following:

- 1) Patients who demonstrate significant and problematic disruptive behaviour or who have problems with inattention that interfere with learning; AND
- 2) Prescribed by or in consultation with a specialist in pediatric psychiatry, pediatrics or a general practitioner with expertise in ADHD; AND
- 3) Have been tried on methylphenidate immediate release (IR) or methylphenidate slow release (SR) or Dexedrine IR or Dexedrine SR (Spansules), and have experienced unsatisfactory results due to poor symptom control, side effects, administrative barriers, or societal barriers.

Administrative barriers include:

- inability of a school to dose the child at lunch;
- the school lunch hour does not coincide with the dosing schedule;
- poor compliance with noon or afternoon doses;
- the patient is unable to swallow tablets. Societal barriers include:
  - the patient or patient's caregiver(s) has(have) a history of substance abuse or diversion of listed immediate-release alternatives;
  - the patient or patient's caregiver(s) is/are at risk of substance abuse or diversion of listed immediate-release alternatives.

### Reason For Use Code and Clinical Criteria

#### Code 171

As first line treatment of elevated intraocular pressure in patients who cannot tolerate an ophthalmic beta-blocking agent or where beta-blocking agents are contraindicated.

LU Authorization Period: Indefinite.

#### Code 172

As second line monotherapy or combination therapy in patients who do not have an adequate intraocular pressure lowering response to ophthalmic beta-blocking agents.

LU Authorization Period: Indefinite.

#### Code 387

For use as adjunctive therapy with an ophthalmic beta-blocking agent in an urgent situation (e.g. patients with a high baseline intraocular pressure) where monotherapy is unlikely to be effective.

LU Authorization Period: Indefinite.
