Inherited Metabolic Diseases (IMD) Program

List of Disorders, Covered Drugs, Supplements and Specialty Foods

Effective March 4, 2016

Ontario Public Drug Programs
Ministry of Health and Long-Term Care

Ontario

Table of Contents

Acronyms:
DIN = Drug Identification Number
PIN = Product Identification Number
NPN = Natural Product Number
SFS SKU = The Hospital for Sick Children's Specialty Food Shop stock number
SAP = Special Access Program
No DIN = Food Supplement or Chemical, no DIN assigned
HSC = Made at The Hospital for Sick Children, no commercial product available

Inquiries regarding the IMD Program should be directed to:
Ontario Public Drug Programs
5700 Yonge Street, 3rd Floor
Toronto ON M2M 4K5

About the IMD Program

Funding and administration of the Inherited Metabolic Diseases (IMD) program was transitioned to Ontario Public Drug Programs (OPDP) in February 2008. One goal of transitioning the IMD program to OPDP is to align it with other drug programs in Ontario. It also creates one point of access in the Ministry of Health and Long-Term Care (Ministry) for all drugs, with clear, consistent and evidence-based methods to make funding decisions.

The IMD subcommittee will evaluate requests for the addition of products and metabolic disorders to the IMD program's List of Disorders, Covered Drugs, Supplements and Specialty Foods (IMD program list). Membership of the subcommittee consists of metabolic and genetic specialists from each of the Ontario Newborn Screening Program regional treatment centres and the University Health Network, a pharmacist and a dietitian. The subcommittee will then make funding recommendations to the Executive Officer (EO), OPDP. For some drug products, the EO may also ask the Committee to Evaluate Drugs to provide a separate review and recommendation. The EO will make the final funding decision based on careful consideration of the subcommittee's recommendations, the public interest and sustainability of the Ontario Public Drug Program.

For new products to be listed under the Drugs and Supplements category on the IMD program list, requests must be submitted by a physician licensed to practice in Ontario. Completed applications will be assigned to a primary reviewer who will then submit a report to the IMD subcommittee. Both will be considered by the IMD subcommittee and their recommendations will then be forwarded to the Ministry and the EO.

For drug products approved for marketing by Health Canada [i.e., those with a drug identification number (DIN) and issued a Notice of Compliance (NOC)], it is the drug manufacturer's responsibility to follow the submission process used for products under consideration for listing on the Ontario Drug Benefit Formulary, and the requirements set out in the *Ontario Guidelines for Drug Submission & Evaluation*. This may include a submission to the Common Drug Review.

For drug products currently listed on the IMD program list, the Ministry has been working with the IMD subcommittee to specify, where appropriate, brand names, manufacturers, dosage forms and strengths, DINs, etc.

Provisional Listings

The IMD subcommittee has recommended an "approve with provisions" category for products and disorders discussed for consideration of inclusion on the IMD product list. Products and disorders with provisional approvals will require further review to determine their final status. Provisional listings are identified in italics.

Provisional listings for individual patients may not be reflected in the published version of the IMD program list. The requesting physician(s) will be notified by the Ministry of the final funding decision and the details of any listing provisions as recommended by the IMD subcommittee.

Notable Changes for this Edition

New products and changes are highlighted.

Disorders

- **1** new disorder has been added: Glucose transporter 1 (GLUT1) deficiency syndrome (GLUT1-DS).

Drugs and Supplements

- Approved disorder(s) have been added to **4** drugs/ supplements.
- DIN/PIN/etc. has been clarified for **5-hydroxytryptophan**. Going forward, only 5-hydroxytryptophan products with valid Natural Product Number (NPN) or compounded from powder available in Canada will be covered.
- Alkaptonuria is removed as a funded disorder for nitisinone due to the lack of published evidence to support effiacy use in any cohort of asymptomatic or symptomatic alkaptonuria patients. The ministry also noted that there are no patients receiving nitisinone for this indication through the IMD Program. Funding remains in place for tyrosinemia type 1.

Food products and other supplements

- 2 new medical foods for tyrosinemia have been added: Tylactin RTD 15 Original and Tylactin Restore 10 Citrus
    - The Ministry has approved the addition of these Tylactin products noting the limited number of products available on the IMD list for patients with tyrosinemia, and the neutral cost to the IMD program.
    - The Ministry has also reviewed the Glytactin series of products for phenylketonuria (PKU) and has decided to to hold making a decision on coverage of these products at this time. There is significantly more choice or products for PKU patients on the current IMD list compared to tyrosinemia. In addition, the proposed price of some Glytactin products exceeds the current price of available alternatives for PKU.

- Numerous “housekeeping” changes to update product SKUs or to remove discontinued products. Discontinued products (removed from list):
    - Phlexy-10 Capsule PKU Lophlex (46995)
    - PhenylAde PheBloc LNAA Tablets (SFS1489)

Disorders Covered by the IMD Program

CATEGORY	DISORDER
Amino Acid Disorders	3-phosphoglycerate dehydrogenase deficiency
	Alkaptonuria
	Gyrate atrophy (ornithine aminotransferase deficiency)
	Homocystinuria (cystathionine beta-synthase [CBS] deficiency)
	Hyperphenylalaninemia, including phenylketonuria (PKU)
	Maple syrup urine disease (MSUD) (branched chain ketoacid dehydrogenase [BCKAD] deficiency)
	Tyrosinemia (includes Types I ,II & III)
Carbohydrate Disorders	Congenital disorder of glycosylation type 1b (CDG-1b)
	Congenital sucrase-isomaltase deficiency (CSID) (intestinal disaccharidase deficiency)
	Galactosemia
	Glycogen storage disorders (GSD)
Cholesterol Biosynthesis Disorders	Smith-Lemli-Opitz syndrome (SLOS)
Fatty Acid Oxidation Defects and Fat Metabolism Disorders	Abetalipoproteinemia
	Apoprotein C-II deficiency
	Carnitine palmitoyl transferase I (CPT I) deficiency
	Carnitine palmitoyl transferase II (CPT II) deficiency
	Carnitine acylcarnitine translocase (CACT) deficiency
	Carnitine uptake defect / carnitine transport defect / primary carnitine deficiency
	Chylomicron retention disease
	Glutaric aciduria Type II (GA II)

CATEGORY	DISORDER
Fatty Acid Oxidation Defects and Fat Metabolism Disorders (cont'd)	Homozygous hypobetalipoproteinemia
	Lipoprotein lipase (LPL) deficiency
	Long chain 3-hydroxyacyl CoA dehydrogenase (LCHAD)/ Trifunctional protein deficiency
	Medium chain acyl CoA dehydrogenase (MCAD) deficiency
	Medium/short chain hydroxyacyl CoA dehydrogenase (M/SCHAD) deficiency
	Short chain acyl CoA dehydrogenase (SCAD) deficiency
	Very long chain 3-hydroxyacyl CoA dehydrogenase (VLCAD) deficiency
Lactic Acidosis (gluconeogenesis disorders)	Fructose-1,6-bisphosphatase deficiency
	Phosphoenol pyruvate carboxykinase (PEPCK) deficiency
	Pyruvate carboxylase (PC) deficiency
	Pyruvate dehydrogenase (PDH) deficiency
Mitochondrial Disorders	Primary mitochondrial disorder not otherwise specified
	Coenzyme Q10 deficiency
	Complex 1 deficiency
	Friedreich's ataxia
	Leber's hereditary optic neuropathy (LHON)
	Leigh's disease
	Mitochondrial encephalopathy, Lactic acidosis, Stroke-like episodes (MELAS) syndrome
	Mitochondrial myopathy
Organic Acid Disorders	2-methylbutyryl-CoA dehydrogenase deficiency

CATEGORY	DISORDER
Organic Acid Disorders (cont'd)	2-methyl-3-hydroxybutyryl-CoA dehydrogenase (MHBD) deficiency / short branched chain hydroxyacyl CoA dehydrogenase (SBCHAD) deficiency
	3-hydroxyisobutyric aciduria
	3-hydroxy-3-methyl-glutaric (HMG) CoA lyase deficiency
	3-methylcrotonyl-CoA carboxylase deficiency (3MCC)
	3-methylglutaconic aciduria (includes Barth syndrome)
	β-Ketothiolase deficiency
	Glutaric aciduria Type I (GA I)
	HMG CoA lyase deficiency
	Isobutyryl-CoA dehydrogenase deficiency
	Isovaleric acidemia
	Malonic aciduria
	Methylmalonic acidemia (MMA)
	Propionic acidemia
	Pyridoxine (B6)-dependent seizures (alpha-aminoadipic semialdehyde dehydrogenase deficiency) [also listed under Vitamin/Cofactor Disorders]
Urea Cycle Disorders	Argininemia
	Arginosuccinic acid lyase (AL or ASL) deficiency/ argininosuccinic aciduria (ASAuria)
	Carbamyl phosphate synthase (CPS) deficiency
	Citrullinemia [arginosuccinic acid synthetase (AS or ASS)] deficiency
	Hyperammonemia-Hyperornithinemia-Homocitrullinemia (HHH)
	N-acetyl glutamate synthetase (NAGS) deficiency
	Ornithine transcarbamylase (OTC) deficiency

CATEGORY	DISORDER
Vitamin/Cofactor Disorders	Biopterin deficiency (includes dihydropteridine reductase [DHPR] deficiency)
	Cobalamin (B12) defect (includes Cbl C,D,G)
	Cobalamin (B12) transport deficiency, includes transcobalamin II (TC II) deficiency
	Hereditary deficiency of tocopherol transport protein
	Methylene tetrahydrofolate reductase (MTHFR) deficiency
	Multiple carboxylase deficiency (MCD) – Biotinidase deficiency
	Multiple carboxylase deficiency (MCD) – Holocarboxylase synthetase deficiency
	Pyridoxal-5-phosphate dependent epilepsy
	Pyridox(amine) 50-phosphate oxidase (PNPO) deficiency
	Pyridoxine (B6)-dependent seizures (alpha-aminoadipic semialdehyde dehydrogenase deficiency) [also listed under Organic Acid Disorders]
	Vitamin E (tocopherol) deficiency
Miscellaneous Disorders	Acute intermittent porphyria
	Cerebrotendinous xanthomatosis
	Creatine synthesis/transport deficiency
	Cystinosis
	Cystinuria
	Erythropoietic protoporphyria (EPP)
	Glucose transporter 1 (GLUT1) deficiency syndrome (GLUT1-DS)
	Hypercalcemia secondary to a listed disease (please specify)
	Lysinuric protein intolerance (LPI)
	Menkes disease
	Renal tubular acidosis (RTA) secondary to a listed disease (please specify on registration form)

Drugs and Supplements

Note: The Ministry continues to receive requests to substitute alternate brands of drugs when the listed brands or DINs have been discontinued. In addition, the transition of many over-the-counter products to natural health products under Health Canada's Natural Health Products Regulations has resulted in many DINs being changed to a **Natural Product Number (NPN).** The Ministry will consider reasonable substitutions if there is little or no difference in cost. Treatment centre pharmacies can contact OPDP with any questions regarding coverage and billing of Drugs and Supplements under the IMD program.

A product in *italics* is considered a provisional listing pending further review by the MOHLTC. Depending on the outcome of this review, the MOHLTC may decide not to fund the product(s) or the listed indication(s) in the future.

DRUGS AND SUPPLEMENTS		
Drug/Supplement	**Approved Disorder(s)**	**DIN/PIN/ETC.**
5-hydroxytryptophan	Biopterin deficiency; Pyridoxine-dependent epilepsy (PDE)	Product must have a valid NPN or may be compounded from powder
Ammonul	Urea Cycle Disorders	SAP
Beta-Carotene (Lumitene, oral)	Erythropoietic Protoporphyria (EPP)	
Betaine (Cystadane)	Homocystinuria (includes homocystinuria secondary to a listed disorder)	SAP
Biotin	Biotinidase deficiency; Holocarboxylase synthetase deficiency; Propionic acidemia; Pyruvate carboxlyase deficiency	No DIN
Chenodeoxycholic acid	*Cerebrotendinous Xanthomatosis*	*No DIN*
Cholesterol	*Smith-Lemli-Opitz syndrome (SLOS)*	*No DIN*
Citrate C	Renal tubular acidosis, secondary to another listed disorder	HSC
Citrulline	Urea cycle disorders; Lysinuric protein intolerance	No DIN
Coenzyme-Q	*Mitochondrial disorders; Glutaric Aciduria II, secondary mitochondrial defects*	*No DIN*

DRUGS AND SUPPLEMENTS		
Drug/Supplement	**Approved Disorder(s)**	**DIN/PIN/ETC.**
Copper histidine	Menkes disease	HSC
Creatine	*Mitochondrial myopathies;* Creatine synthesis/transport deficiency; Gyrate atrophy	SAP
Cupric Chloride	*Menkes disease*	
Cysteamine (Cystagon or cysteamine powder for compounded products)	Cystinosis	SAP
Dichloroacetate	Pyruvate dehydrogenase deficiency	SAP
Glycine	Isovaleric academia; Creatine transport deficiency	No DIN
Hemin (Normosang)	Acute intermittent porphyria **Note:** Eligibility criteria for IMD program funding (all criteria must be met): 1. *Diagnosis of acute intermittent porphyria should be confirmed by biochemical and molecular testing, and;* 2. *Hemin (Normosang) infusions should only be given under supervision and be prescribed by hematologists, gastroenterologists or metabolic specialists, and;* 3. *For continued funding, yearly follow up report should be submitted to the IMD program by the prescribing physician.*	SAP
Hydroxycobalamin	Cobalamin defect; Methylmalonic acidemia	SAP
L-arginine	Lysinuric protein intolerance; MELAS syndrome; Pyridoxine (B6)-dependent seizures; Urea cycle disorders; Creatine transport deficiency	No DIN
L-aspartic acid	Pyruvate carboxylase deficiency	No DIN

DRUGS AND SUPPLEMENTS		
Drug/Supplement	**Approved Disorder(s)**	**DIN/PIN/ETC.**
L-carnitine	Organic acidemias; Fatty acid oxidation defects; carnitine uptake defect, carnitine deficiency secondary to another listed disorder	DIN=02144336, DIN=02144328, DIN=02144344
L-isoleucine	MSUD, organic acid disorders	No DIN
L-lysine	Lysinuric protein intolerance	No DIN
L-valine	MSUD, organic acid disorders	No DIN
Lipoic Acid	*Mitochondrial disorders*	
Mannose	Congenital Disorders of Glycosylation	No DIN
Niacinamide	*Mitochondrial cytopathies*	*No DIN*
Nitisinone (NTBC, Orfadin)	Tyrosinemia Type I	SAP
Ornithine HCl, ornithine L-aspartate	Urea cycle disorders; HHH; Creatine synthesis/transport deficiency	No DIN
Phosphocysteamine	Cystinosis	SAP
Pyridoxal-5-phosphate	Pyridoxal-5-phosphate dependent epilepsy; Pyridox(amine) 50-phosphate oxidase (PNPO) deficiency	Product must have a valid NPN
Pyridoxine HCl	Homocystinuria (includes homocystinuria secondary to a listed disorder); Pyridoxine (B6)-dependent seizures	DIN 00497517 NPN 00232475 NPN 00268607
Riboflavin	*Mitochondrial disorders;* Glutaric aciduria	*No DIN*
Sapropterin (Kuvan)[1]	Biopterin deficiency	DIN 02350580
Serine	3-phosphoglycerate dehydrogenase deficiency	No DIN
Sodium benzoate	Creatine synthesis/transport deficiency; Urea cycle disorders	No DIN

[1] Sapropterin (Kuvan®) is not reimbursed under the IMD program for the treatment of phenylketonuria (PKU). Funding for PKU is considered under the Exceptional Access Program (EAP) only. Under an agreement with the manufacturer, the maximum reimbursable price for Kuvan under the IMD program is $33.00 per 100mg tablet.

DRUGS AND SUPPLEMENTS		
Drug/Supplement	**Approved Disorder(s)**	**DIN/PIN/ETC.**
Sodium phenylbutyrate [2]	*Urea cycle disorders*	
Thiamine (Vitamin B1)	*Mitochondrial cytopathies;* Thiamine deficiency in the presence of IMD	*DIN 00816078* *NPN 00268631* *NPN 00294853*
Tiopronin (Thiola)	*Cystinuria*	*SAP*
Vitamin A/D/E/K	Abetalipoproteinemia; *Mitochondrial disorders*	Product must have a valid DIN or NPN
Vitamin A	Abetalipoproteinemia	Product must have a valid DIN or NPN
Vitamin B50 Complex	Mitochondrial disorders (for patients requiring multiple B vitamins and where the cost of vitamin B50 complex does not exceed the cost of the individual vitamins).	Product must have a valid NPN
Vitamin D	Abetalipoproteinemia	Product must have a valid DIN or NPN
Vitamin E	Abetalipoproteinemia; Hereditary deficiency of tocopherol transport protein; *Mitochondrial disorders;* Vitamin E deficiency	Product must have a valid DIN or NPN
Vitamin K1	*Mitochondrial disorders*	Product must have a valid DIN or NPN
Vitamin K3	*Mitochondrial disorders*	Product must have a valid DIN or NPN

[2] The Ministry of Health and Long-Term Care is aware that the Buphenyl formulation of sodium phenylbutyrate may no longer be available in Canada. The IMD program will provide funding for Pheburane® on an interim basis pending a further review to determine the final listing status.

PhenylAde PheBloc LNAA Pouches	PKU **Note:** Eligibility criteria for IMD program funding (all criteria must be met): *1. The patient will have untreated/late-diagnosed PKU OR early diagnosed PKU with elevated blood phenylalanine concentrations beyond his/her ability to correct with the phenylalanine-restricted diet;AND* *2. The patient will have blood phenylalanine concentrations which are chronically above his/her treatment goal;AND* *3. The patient will be 13 years of age or over; AND* *4. The patient will not be pregnant or planning a pregnancy;AND* *5. The patient will not also be treated with sapropterin dihydrochloride (Kuvan);AND* *6. It is recommended that the patient use PheBloc (divided evenly between meals) to provide between 0.25-0.5 grams protein equivalent/kg/day (use adjusted body weight for overweight & obese individuals); AND* *7. It is recommended that the patient supplement the intake of protein from PheBloc with natural protein foods (and a "medical food" if necessary), to achieve a total protein intake of no less than 1 gram protein/kg/day (use adjusted body weight for overweight & obese individuals); AND* *8. The patient will use PheBloc only under the direction of a metabolic geneticist/metabolic dietitian.* *Continued use of PheBloc is approved only for patients who are assessed by the metabolic geneticist to have had an improvement in signs and/or symptoms associated with elevated blood phenylalanine concentrations.*	Nutricia	SFS1487 (pouches),

Complete Enteral Feeds

Eligibility criteria for enteral feeds:
Nutrition products will be reimbursed under the IMD program for registered persons when prescribed by a practitioner and when one of the following criteria is met:

- the product is used as part of a treatment plan in addition to medical foods (i.e., modified L-amino acid mixtures) or special low protein foods; OR
- the product is used as part of a treatment plan without medical foods (i.e., modified L-amino acid mixtures) or special low protein foods, and is the primary source of nutrition (e.g., greater than 90% of caloric intake); OR
- the product is used as part of a treatment plan for prevention of hypoglycemia in glycogen storage disorders (continuous and/or bolus feeds)

Exclusion criteria for enteral feeds:
A nutrition product will not be reimbursed under the IMD program if the patient qualifies for reimbursement under the Ontario Drug Benefit (ODB) program or if it is intended for one of the following uses:

- voluntary meal replacement
- convenience
- food allergies
- body building

If the following products are the <u>sole</u> source of nutrition, coverage may be available for eligible persons under the Ontario Drug Benefit Program
