

Notice from the Executive Officer

November 28, 2012

Please be advised that new controlled substance medications have been added to the ministry's Monitored Drugs List (MDL). As with all monitored drugs, dispensers are required to submit dispensing information to the [Narcotics Monitoring System](#) (NMS).

Pharmacists are reminded that the NMS serves as a central database to enable the collection and review of dispensing information regarding all narcotic and controlled drugs dispensed within the community-based health care sector, including those that are not covered by Ontario's Public Drug Programs.

On November 23, 2012, the ministry issued a consultation notice regarding proposed changes to the regulations under the Ontario Drug Benefit Act and the Drug Interchangeability and Dispensing Fee Act. The changes, if implemented, would require certain conditions to be met in order for controlled-release oxycodone to be listed as a benefit under the Ontario Drug Benefit program and declared an interchangeable product. Specifically, the regulations propose that controlled-release oxycodone will not be listed as a benefit or declared as interchangeable unless it has tamper-resistant features. For further details please refer to the [Executive Officer notice](#) dated November 23, 2012.
