Appendix B: Provincial Case Definitions for Reportable Diseases

Disease: *Campylobacter* enteritis

Revised January 2014
Campylobacter enteritis

1.0 Provincial Reporting
   Confirmed and probable cases of disease

2.0 Type of Surveillance
   Case-by-case

3.0 Case Classification

3.1 Confirmed Case
   Laboratory confirmation of Campylobacter spp. with or without clinically compatible signs and symptoms:
   - Isolation of Campylobacter spp. from an appropriate clinical specimen (e.g. stool, urine, body fluids)
   OR
   - Detection of Campylobacter spp. by nucleic acid amplification testing (NAAT) from an appropriate clinical specimen (see above)

3.2 Probable Case
   Clinically compatible signs and symptoms in a person with an epidemiologic link to a laboratory-confirmed case

4.0 Laboratory Evidence

4.1 Laboratory Confirmation
   The following will constitute a confirmed case of Campylobacteriosis:
   - Positive culture for Campylobacter spp.
   - Positive nucleic acid amplification test (NAAT) assays for Campylobacter spp.

4.2 Approved/Validated Tests
   - Standard culture for Campylobacter spp.
   - Nucleic acid amplification test (NAAT) assays for Campylobacter spp.

4.3 Indications and Limitations
   - Further strain characterization is indicated for epidemiological, public health and control purposes
5.0 Clinical Evidence

Clinically compatible signs and symptoms are characterized by diarrhea, abdominal pain, malaise, fever, nausea, and/or vomiting

6.0 ICD Code(s)

6.1 ICD-10 Code(s)

A04.5 *Campylobacter* enteritis

6.2 ICD-9/ICD-9CM Code(s)

008.43 *Campylobacter*

| 3.1 Confirmed Case | Addition of second bullet point: “**OR** Detection of *Campylobacter* spp. by nucleic acid amplification testing (NAAT) from an appropriate clinical specimen (see above)”.
| 4.1 Laboratory Confirmation | Addition of second bullet point: “Positive nucleic acid amplification test (NAAT) assays for *Campylobacter* spp.”.
| 4.2 Approved/ Validated Tests | Addition of second bullet point: “Nucleic acid amplification test (NAAT) assays for *Campylobacter* spp.”.
| 4.3 Indications and Limitations | Deletion of first bullet point: “Commercial nucleic acid amplification test (NAT) assays for *Campylobacter* spp. are presently not available”.
