EMERGENCY DEPARTMENT ACTION PLAN FOR ONTARIO INVESTING IN COMMUNITY RESOURCES TO PROVIDE MORE CARE

\$52.4 million is being invested in community-based services to provide quality patient care in the community, relieving pressures on hospitals and emergency departments.

Home Care Services

\$30 million in funding for Community Care Access Centres so they may better serve the needs of their clients and provide services that most appropriately meet their needs and allow people to remain safely, comfortably and independently in their homes longer.

Investments in community care will alleviate some of the pressure on emergency departments by allowing hospitals to focus on critical services and allow patients to move through the system and obtain the level of care that is necessary and appropriate.

This funding will be allocated in the near future.

Community Health Centres (CHC)

\$8.8 million base funding investment will benefit each of the 54 existing CHCs and 10 Satellite CHCs. The funding will allow the CHC sector to hire more than 50 new staff including physicians, nurse practitioners, registered nurses, community health workers, health promoters and other health professionals, leading to increased access to primary care for clients.

Long-Term Care and Community Care Pressures

\$5.3 million initial investment that will be part of a multi-year strategy to address pressures in communities experiencing the most serious long-term care and community care pressures. This strategy will result in expansion of community services and the addition of more long-term care beds in the communities of Thunder Bay, London, Kingston, Guelph, Sudbury, Hastings County, Niagara Region, Simcoe County, Ottawa and Windsor.

Under the strategy 1,750 new long-term care beds will be built and 662 beds will be replaced.

Diabetes Education Teams

\$8.3 million under the Diabetes Care Strategy is being allocated to create 33 Diabetes Education Teams. Each team will consist of a registered nurse and a registered dietitian and will enhance existing community diabetes education programs. The teams will ensure that diabetes programs and services provide a focus on diabetes education, early intervention and effective prevention of diabetes-related complications

This initiative helps to address recommendations from the *Improving Access to Emergency Care: Addressing System Issues* report which calls for increased support of chronic disease education and treatment.
