## **To Ontario residents receiving home oxygen therapy funded through the Assistive Devices Program**

The government is introducing changes to the Assistive Devices Program that will make home oxygen therapy more affordable for Ontario patients, with their co-payment costs lower under the new pricing model. All Ontarians currently eligible for full coverage for the home oxygen cost will continue to be fully covered. Ontarians who are required to pay the 25% co-payment will see their cost decrease.

The monthly flat rate will decrease to \$336.15 for Southern Ontario and to \$357.32 for Northern Ontario. The pricing change will be effective on August 1, 2019.

As someone using Ontario's Assistive Devices Program, you can continue to access the care you need and the providers you trust. The health services you receive will remain uninterrupted. The government will work with the health care partners and home oxygen vendors to manage the transition without affecting your care.

Every part of the government's plan to build a modern, sustainable and integrated health care system starts and ends with the patient. We are building a health care system for the people.

If you have any questions regarding the change in prices for home oxygen therapy, you can call the program directly at (416) 327-8804 or toll-free at 1-800-268-6021. You can also contact the program at [adp@ontario.ca](mailto:adp@ontario.ca)
