

Updated: Executive Officer Notice: Administration of Publicly Funded COVID-19 Vaccines in Ontario Pharmacies – Eligibility

Effective September 1st, 2021

Certain eligible pharmacies can administer publicly funded injectable COVID-19 vaccines to eligible Ontarians (see Pharmacy Eligibility below).

The purpose of this Executive Officer (EO) Notice (Administration of the Publicly Funded COVID-19 Vaccines in Ontario Pharmacies – **Eligibility**), the EO Notice: Administration of the Publicly Funded COVID-19 Vaccines in Ontario Pharmacies – **Billing**, and the accompanying Questions and Answers (Qs & As) documents, are to set out the terms and conditions for a participating pharmacy's submission of claims for payment (claims) for administering injectable COVID-19 vaccines to eligible Ontarians. Each document is a ministry policy that pharmacy operators must comply with under section 3.2 of the Health Network System (HNS) Subscription Agreement for Pharmacy Operators.

The two (2) EO Notices and the accompanying Qs & As documents are **not** intended to describe a pharmacy operator's obligations in respect of administering injectable COVID-19 vaccines under applicable legislation, other agreements with the Province of Ontario, or policies of the OCP. Pharmacy operators with questions about their legal obligations outside of the HNS Subscription Agreement should refer to the applicable legislation, other agreement, or OCP policy as appropriate.

This EO Notice (Administration of the Publicly Funded COVID-19 Vaccines in Ontario Pharmacies – **Eligibility**) replaces the previous EO notice on the same topic respecting the administration of publicly funded COVID-19 vaccines in Ontario pharmacies that was effective August 18th, 2021.

Pharmacy eligibility

In order to be eligible to submit claims for administering a publicly funded COVID-19 vaccine, a pharmacy operator (also referred to in this document as a “participating

pharmacy”) must be selected to participate by the ministry and meet the following requirements:

- Have a valid HNS Subscription Agreement with the ministry
- Have a valid agreement with the ministry respecting COVID-19 vaccine administration and the use of the Provincial COVID-19 vaccine solution (the “COVID-19 Vaccine Agreement”); and
- Enrolled in the 2020-21 Universal Influenza Immunization Program (UIIP).

This eligibility criteria may be updated from time to time. Please refer to the [ministry website](#) for the most recent version of this notice.

Patient eligibility

Table 1 – Eligibility for first dose administration*

Vaccine Product	Eligibility Criteria
Pfizer-BioNTech COVID-19 vaccine (DIN: 02509210)	Individuals who are 12 years of age or older at the time of vaccination or any time during 2021***
COVID-19 vaccine MODERNA (DIN: 02510014)	Individuals who are 18 years of age or older at the time of vaccination
COVISHIELD COVID-19 vaccine (DIN: 02512947) and COVID-19 vaccine AstraZeneca (PIN: 09857655)	Individuals who are 18 years of age or older at the time of vaccination and who have a confirmed allergy to components of the mRNA vaccines, if the individual has been assessed by an allergist / immunologist and the pharmacy has received a completed COVID-19 Vaccination: Allergy Form prior to administering the COVISHIELD / AstraZeneca vaccine.

Table 2 – Eligibility for second dose administration**

The following rules apply to the interpretation of the eligibility criteria in Table 2 below.

- Persons who received a first dose of the AstraZeneca/COVISHIELD vaccine may receive either AstraZeneca/COVISHIELD vaccine or an mRNA vaccine (Pfizer-BioNTech or Moderna) for their second dose, unless contraindicated. According to [NACI](#) recommendations, an mRNA vaccine is now preferred as the second dose for individuals who received a first dose of the AstraZeneca/COVISHIELD vaccine, based on emerging evidence of a potentially better immune response from this mixed vaccine schedule and to mitigate the potential risk of VITT associated with viral vector vaccines.
- Persons who received a first dose of an mRNA vaccine (Pfizer-BioNTech or Moderna) should be offered the same mRNA vaccine for their second dose, unless the same mRNA vaccine is not readily available* or the vaccine used for the first dose is unknown, in which case, another mRNA vaccine can be considered interchangeable and should be offered to complete the vaccine series. Note: An mRNA vaccine followed by a second AstraZeneca vaccine is not an acceptable interchangeable vaccine series. * Note, readily available means easily available at the time of vaccination without delay or vaccine wastage.
- Where a different product is used to complete the mRNA vaccine series, the appropriate minimum dose interval should be determined from the product monograph of the mRNA vaccine used for the first dose (21 days where the Pfizer-BioNTech vaccine was used for the first dose, and 28 days where the Moderna vaccine was used for the first dose). Note that an interval of 28 days for Pfizer may be considered for operational feasibility. For more information refer to the Q&A for Health Care Providers on Mixed COVID-19 mRNA Vaccine Schedules available [here](#), and the COVID-19 Vaccine Series Second Dose Eligibility Quick Reference available [here](#).

Vaccine Product	Eligibility Criteria
COVISHIELD COVID-19 vaccine (DIN: 02512947) and	<ul style="list-style-type: none"> • Individuals who received AstraZeneca/COVISHIELD vaccine for their first dose and choose to receive the AstraZeneca/COVISHIELD vaccine for their second dose may receive their second dose at least 8 weeks after their first dose, unless they are eligible for an earlier second dose based on the exception below.

<p>COVID-19 vaccine AstraZeneca (PIN: 09857655)</p>	<ul style="list-style-type: none"> • Exception: individuals with certain health conditions as documented in a letter from a health care provider, as more particularly described here, may receive their second dose as early as 4 weeks <hr/> <ul style="list-style-type: none"> • Individuals who are at least 18 years old who received the Pfizer-BioNTech or Moderna mRNA vaccine for their first dose and had a severe allergic reaction or anaphylaxis to that vaccine as assessed by an allergist / immunologist and documented in a COVID-19 Vaccination: Allergy Form, may receive their second dose with the AstraZeneca / COVISHIELD vaccine if: <ul style="list-style-type: none"> ▪ at least 21 days have passed since their first dose with the Pfizer-BioNTech vaccine; or ▪ at least 28 days have passed since their first dose with the Moderna vaccine.
<p>Pfizer-BioNTech COVID-19 vaccine (DIN: 02509210)</p> <p>and</p> <p>COVID-19 vaccine MODERNA (DIN: 02510014)</p>	<ul style="list-style-type: none"> • Individuals who received their first dose of AstraZeneca/COVISHIELD vaccine and choose to receive one of the mRNA vaccines (Pfizer or Moderna) as their second dose may receive their second dose at least 8 weeks after their first dose, unless they are eligible for an earlier second dose based on the exception below. • Exception: individuals with certain health conditions as documented in a letter from a health care provider, as more particularly described here, may receive their second dose as early as 4 weeks. <hr/> <ul style="list-style-type: none"> • Individuals who received their first dose of an mRNA vaccine (Pfizer or Moderna) may receive their second dose at an interval of up to 16 weeks, unless they are eligible for an earlier second dose based on the following rules. <p><u>As of June 28, 2021:</u></p> <ul style="list-style-type: none"> ○ Individuals who are 18 years of age or older, if:

	<ul style="list-style-type: none"> ▪ at least 21 days have passed since their first dose with the Pfizer-BioNTech vaccine; or ▪ at least 28 days have passed since their first dose with the Moderna vaccine. <p><u>As of July 5, 2021:</u></p> <ul style="list-style-type: none"> ○ Individuals who are 12 to 17 years of age, if at least 21 days have passed since their first dose. These individuals are only eligible to receive a second dose of the Pfizer BioNTech vaccine. <p><u>As of August 18, 2021:</u></p> <ul style="list-style-type: none"> ○ Individuals who are turning 12 years of age at any time during 2021, if at least 21 days have passed since their first dose. These individuals are only eligible to receive a second dose of the Pfizer BioNTech vaccine.***
--	---

Table 3 – Eligibility for third dose administration****

The following rules apply to the interpretation of the eligibility criteria in Table 3 below.

- Only mRNA vaccines (Pfizer-BioNTech or Moderna) are being offered to eligible persons for third doses, unless the person had a severe allergic reaction or anaphylaxis to a mRNA vaccine as assessed by an allergist / immunologist and documented in a COVID-19 Vaccination: Allergy Form, in which case the third dose may be the AstraZeneca / COVISHIELD vaccine.
- Persons who received a second dose of an mRNA vaccine (Pfizer-BioNTech or Moderna) should be offered the same mRNA vaccine for their third dose, unless the same mRNA vaccine is not readily available* or the vaccine used for the second dose is unknown, in which case, another mRNA vaccine can be considered interchangeable and should be offered. *Note, readily available means easily available at the time of vaccination without delay or vaccine wastage.

Vaccine Product	Eligibility Criteria
Pfizer-BioNTech COVID-19 vaccine (DIN: 02509210)	<p>As of August 18, 2021:</p> <ul style="list-style-type: none"> Residents of high-risk retirement homes¹ as identified by the local public health unit and the retirement home, if at least 5 months have passed since receiving their second dose and the vaccine is administered at the retirement home ****
COVID-19 vaccine MODERNA (DIN: 02510014)	

* See Executive Officer Notice dated May 11, 2021 regarding the Ministry of Health’s direction to pause the administration of first doses of publicly funded AstraZeneca / COVISHIELD COVID-19 vaccines in Ontario pharmacies, available [here](#).

**See the most recent version of the Executive Officer Notice: Administration of Publicly Funded COVID-19 Vaccines in Ontario Pharmacies – Billing for age restrictions for the vaccines based on the applicable product monographs, available [here](#).

*** Pharmacies should be informed and stay current with the vaccine’s official indications in accordance with Health Canada’s approved product monograph. The Pfizer-BioNTech COVID-19 vaccine is currently indicated for use in individuals 12 years of age and older. However, Ontario is extending eligibility for the Pfizer-BioNTech COVID-19 vaccine to children born in 2009. Ontario has closely monitored data from Alberta and British Columbia in making this decision, and these provinces have offered the Pfizer vaccine to youth born in 2009 for several months with no risks identified.

**** The province will begin offering third doses of a mRNA COVID-19 vaccine to specific immunocompromised population groups and residents of long-term care homes, high-risk retirement homes and elder care lodges. See [ministry announcement](#) for more information. At this time, claims for third doses may only be submitted to the HNS when pharmacies administer third doses to residents of high-risk retirement homes at the resident’s retirement home as per arrangements with local public health units.

Pharmacies should be informed and stay current with the vaccine’s official indications in accordance with Health Canada’s approved product monograph. At this time, the recommended dosing in the product monographs consists of a two dose series for both Pfizer and Modern mRNA vaccines. Ontario is funding third doses for select vulnerable populations, based on recommendations of the Chief Medical Officer of Health and other health experts as noted in [ministry guidance](#).

¹ The list of high-risk retirement homes will be sent to pharmacies through their ONEMail account.

This eligibility criteria may be updated from time to time. Please refer to the [ministry website](#) for the most recent version of this notice and for details of the provincial rollout plan, please visit the [ministry's website](#).
