### Accountability agreement(s) or ministry initiative(s) the indicator supports

- HCC standard reports
- The Quarterly

## Numerator

### Data source

HCC ETL file

### Inclusion/exclusion criteria

#### Includes:

1. Status = "REF";
2. End\_dt = .

#### Excludes:

N/A

## Calculation

### Steps:

1. Identify from HCC ETL file the number of active HCC registrations where the patient has been referred;
2. Multiply the number from Step 1 by 100 (for percentage calculation).

## Denominator

### Data source

HCC ETL file

### Inclusion/exclusion criteria

#### Includes:

1. End\_dt = .

## Calculation

### Steps:

1. Identify from HCC ETL file the number of active HCC registrations.

## Timing and geography

### Timing/frequency of release

**How often and when data are being released (e.g., be as specific as possible...data are released annually in mid-May)**

For HCC ETL file, the previous month data are released on the first work day of the following month.

### Trending

#### Years available for trending

2009 (since program inception in February 2009).

### Levels of comparability

#### Levels of geography for comparison

The indicator is calculated at the provincial and LHIN level. Data also supports reporting at other levels of geography such as census subdivision and Forward Sortation Area.

# Additional information

## Limitations

### Specific limitations

N/A

## Comments

### Additional information regarding the calculation, interpretation, data source, etc.

Unless otherwise stated, the indicator is based on cumulative data, data collected since program inception. Where that is the case, the number of registrations and percentage referred summarize program activities since February 2009 and are not reflective of recent activities.
